

Swimming Pool Filter Replacement Rebate

It pays not to backwash.

Here's a dirty little secret about your old swimming pool filtering system:

It wastes water, energy and money. It's time to consider a new water- and energy-efficient cartridge filter system. Here's why:

- SAWS will give you a rebate up to \$250 on your water bill when you replace your pool's sand or diatomaceous earth (D.E.) filter(s) with a new high-efficiency cartridge filter system.
- Replacing your sand or D.E. filter with a high-efficiency cartridge filter system can reduce your water consumption by as much as 20,000 gallons per year.
- Translation: Lower water and energy bills.

Here's how it works:

- Rebate will be credited to the SAWS water account of the applicant.
- Rebate is available only on filter systems purchased after June 1, 2012.
- Fill out this application and send it, along with your ORIGINAL RECEIPT, to: SAWS Conservation, P.O. Box 2449, San Antonio, TX 78298-2449.
- A SAWS representative may contact you to verify installation.
- For additional information, call 704-SAVE.
